Forecast For Northeast England
Issued by Met Office Exeter
at 1600 on Saturday 25 Dec 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Rain, sleet and hill snow spreading northwards.

This Evening and Tonight:
Crisp with clear spells initially, but becoming increasingly cloudy from the south later in the night, culminating in a period of rain, sleet and hill snow, with some icy stretches possible. Low cloud becoming extensive by this time. Minimum temperature -4 deg C (25 deg F).

Sunday:
A cold and extensively cloudy day, with a band of rain, sleet and hill snow making very gradual progress northwards. This band should become lighter and more intermittent later. Maximum temperature 3 deg C (37 deg F).

Outlook for Monday to Wednesday:
Low cloud perhaps extensive in light winds Monday, as well as a little rain or showers. Perhaps driest on Tuesday, ahead of a milder but likely wetter and windier Wednesday.
